**Additional Facility Information**

Building 906 was an approximately 25,000 square foot building constructed in 1994. The structure was a steel frame building built on a concrete foundation. The walls and roof were constructed of insulated aluminum attached to a steel frame.

Building 906 had the following utilities: electrical and fire protection provided by an overhead sprinkler system and wall mounted fire extinguishers.

Building 906 contained RCRA Container Storage Unit MS 001, Sub-Unit 14, which was closed in accordance with the Closure Description Document, submitted December 27, 2004. CDPHE acceptance of the administrative closure was received on January 24, 2005.

The entire B906 structure was removed during D&D activities, and sent offsite for disposal. The utilities were disconnected and removed to at least three feet below final grade as indicated on the attached map. There are no remaining structural components, utility lines, or parts of the foundation. The buildings are not in an IHSS or PAC and no staining was observed after the slab was removed; therefore no soil sampling is required.
